

Loading Arms

JRE Pvt. Ltd represents Wiese Europe on an exclusive basis to sell and market Marine Loading Arms, Land Loading Arms and Spares in India. Wiese Europe has more than 20 years of experience in loading arms manufacturing, making it one of the major players in this industry.

Marine Loading Arms

Marine loading arms are used for the transfer of liquid or gaseous products from the ship to the shore instead of hoses.

Special Features of Wiese MLA's:

- Size Range from DN 150 to 400 (6" to 16")
- Construction in Steel or Stainless Steel
- Easy exchange of Seals without dismantling loading equipment and without auxiliary equipment
- Trolley mounted loading arms also in the range
- Separate support construction in steel
- Hydraulically or manually operated
- PTFE seals
- Easily adjustable counter weight

Optional Accessories:

- Emergency Release Couplings
- Quick Connect Disconnect Coupling
- Vapour return line
- Remote control
- Insulation
- Trolley mounting

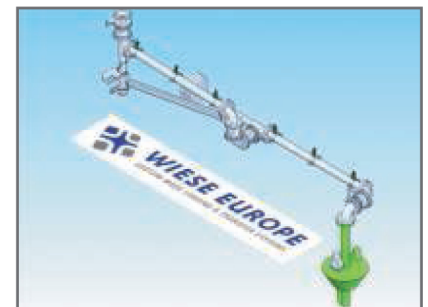

Land Loading Arms

Land loading arms are used as an alternative to hoses for the transfer of gases or liquid products

A few applications would be as follows:

- Chemical Rail/Truck wagon loading or unloading
- LPG or any other Cryogenic gas loading or unloading
- Hydro carbon loading or unloading
- Chemical drum filling

Optional Accessories:

- Teflon Lining
- Dry Break Couplings
- Break Away Couplings
- Remote Control
- API Couplers
- Insulation
- Overfill Protection System

Size range - 1" to 6"

Piping material Steel or Stainless steel; other materials are available on request
